

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, May 18, 2014 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (91 new fires)
 New large fires: 2 (*)
 Large fires contained: 2
 Uncontained large fires: ** 7
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Strong westerly flow will continue across much of the West as a trough moves into the northwestern corner of the U.S. Dry and windy conditions across the Southwest will elevate the risk of significant fires. Cooler weather with scattered showers will push into the Northwest and the northern Rockies. Strong southerly winds will spread across the Plains while cool high pressure remains over the eastern U.S. Scattered showers and a few thunderstorms will develop over the Southeast. In Alaska, cooler conditions with some scattered shower activity will move through the central and eastern parts of the state.

POWERLINE SAFETY

Miscellaneous Fireline Hazards

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential equipment damage or injury:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Keep all aviation activity away from power lines. Inform air attack and/or other aviation resources of the location of the power lines.
- Don't drive with long antennas under power lines.
- Don't stand near power lines during retardant drops.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Don't apply straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near, jump clear, don't hang on, keep feet together, and bunny hop away.
